Highly Inspired Designs

What is a domain: A domain is a unique name that identifies a website on the internet. It's like the address of a physical location, but instead of a street address, it's a unique combination of letters and numbers that people type into their web browsers to access a website. For example, google.com is a domain name.

Website: A website is hosted on a domain. Once you register a domain name, you can then use it to host your website. When someone types your domain name into their browser, it directs them to the server where your website is hosted, and they can access your website.

Size of domain with regards storage: The storage size required for a high school website depends on the content and features you plan to include on your website. Generally, a high school website may require a storage size of 1 GB to 5 GB, depending on the amount of content, such as images, videos, and documents, that you plan to upload to the website.

Here are some examples of what you might consider when determining the size of storage you need:

If you plan to have a simple website with basic information about the school, such as contact information, location, and general information, a storage size of 1 GB to 2 GB should be sufficient.

If you plan to have a website with more extensive content, such as photos and videos of school events, student work, and archives, you may require a storage size of 3 GB to 5 GB.

It's always a good idea to start with a smaller storage size and increase it as needed. You can always upgrade your hosting plan later if you need more space.

It's also important to note that in addition to storage size, you should consider other factors, such as bandwidth, security, and support when choosing a hosting provider for your high school website

Below is a list of the suited packages for the school.

Option 1

Storage – 3000 MB

Email accounts – 10

SQL Data Base – 2

Website Traffic – Unlimited

Control panel – Cpanel

R80.00 per month + a yearly renewal fee of +- R120 (first year for co.za domains is free)

Option 2

Storage – 4000 MB

Email accounts – 15

SQL Data Base – 5

Website Traffic – Unlimited

Control panel – Cpanel

R105.00 per month + a yearly renewal fee of +- R120 (first year for co.za domains is free)

Option 3

Storage – 10 000 MB

Email accounts – 30

SQL Data Base – 20

Website Traffic – Unlimited

Control panel – C-panel

R140.00 per month + a yearly renewal fee of +- R120 (first year for co.za domains is free)

Personally, I would suggest option 1 and form their see how if more storage space is needed. Domain packages can be upgraded at anytime with out affecting the website.

Please feel free to contact me with any questions.
